L

Lactase activity, intestinal, in the small intestine of two breeds of swine from birth to 6 weeks of age, 1032.
——of the small intestinal mucosa and the contents of the small intestine and cecum of the pig, effects of diets containing dried whey, 851.
Lactation of first-litter sows, effects of various protein levels, 1291.
Lamb tissues, cadmium interactions with copper, iron, zinc, and manganese, 599.
Lard, glucogenic and ketogenic capacities of in fasting rats, 185.

Large intestine of the rat, the absorption of fructose-L-tryptophan, 989.
Lead poisoning in vitamin E-deficient rats, 1481.
— and zinc, toxic levels in pigs, interactions of dietary calcium, 112.
Leucine in the diet of growing rats, efficiency of α-ketoisocaproic acid as a substitute, 798.
—, effect of substitution of α-hydroxy analog in diet of rats, 372.
—, excess intake, effect on tryptophan and niacin metabolites in humans, 1241.
Life-term effects of mercury, methyl mercury, and nine other trace metals on mice, 452.
— studies in rats, effects of aluminum, barium, beryllium, and tungsten, 421.
Lighting regimen, circadian rhythms in mice fed a single daily meal at different stages of, 171.
Linoleate enrichment of diet and prostaglandin metabolism in rats, 995.
—, increased dietary, effect upon in vivo platelet function in man, 1286.
Linoleic acid isomers, effects on the metabolism of linoleic acid in rats, 393.
— — metabolism in rats, effects of the *trans* isomers, 393.
Lipid(s) absorption by chickens, 827.
— composition of brown adipose tissue as related to nutrition during the neonatal period in hypotrophic rats, 982.
— content of fasted rat carcass as affected by previous feeding of high carbohydrate or high fat diets, 90.
—, dietary, influence on iron and copper levels of rats administered oral contraceptives, 1269.
— metabolism of rats fed high carbohydrate diets, effect of exercise, 718.
— peroxidation and glutathione peroxidase activity in the liver of cholesterol-fed rats, 946.
— peroxides, formation and some enzymic activities in the liver of vitamin E-deficient rats, 364.
—, tissue, in male white rat, dietary effects of esterified fatty acids, 676.
—, tissue, and serum lipoproteins of rats fed two levels of fat, effect of exercise, 581.
Lipogenesis in the rat, response to diet and exercise, 190.
Lipogenic enzyme(s) activities in some organs of rats fed ad libitum, effects of a high fructose diet, 1377.
— — activity in the chicken, influence of meal frequency, 963.
— — in adipose tissue from fasted and fasted-refed steers, 1055.
Lipoprotein(s) lipase activity in the rat, effects of diet, 447.
—, serum and tissue lipids of rats fed two levels of fat, effect of exercise, 581.
Liver(s) amino acid-catabolizing enzymes in rats, effect of zinc deficiency, 26.
— of cholesterol-fed rats, lipid peroxidation and glutathione peroxidase activity, 946.
— enzymes in rats, 1186.
— enzymes in rats, effect of dietary cholesterol, 939.
—, ethanol-induced fatty, in KK and KK-A^y mice, effects of nutritional factors on development, 1263.
—, ethanol-induced fatty, in KK-A^y mice, metabolic studies on the development, 1500.
—, fatty, induction of ethanol drinking in KK and KK-A^y mice, 1253.
— of mature Japanese quail, effect of choline deficiency on utilization of labeled precursors of choline and turnover of choline, 226.
— microsomal enzyme induction in rats fed varietal cauliflower leaves, 1592.
— mitochondrial function, effect of semistarvation in rat, 208.
—, neonatal rat, effect of starvation on protein synthesis, 1326.
—, perfused rat, gluconeogenesis from L-cysteine, 379.
—, perfused rat, relative importance of the two major pathways for the conversion of cysteine to glucose, 1440.
— and plasma fatty acids in rats fed low and high fat diets, effects of pyridoxine deficiency, 1371.
—, rat, effect of zinc deficiency during latter third of pregnancy, 1466.
—, rat, effects of early undernutrition and subsequent refeeding on alkaline ribonuclease activity, 1104.
—, rat, effects of low and high protein diets on induction of microsomal drug-metabolizing enzymes, 1631.
Liver, rat, effects of protein content of diet and cortisol treatment on uptake of arginine, 1215.
—, rat, effects on protein synthesis of a high tyrosine–low protein diet, 885.
—, regenerating, from rats adapted to controlled feeding schedules, ornithine decarboxylase activity, 408.
— transaminase activity in the rat, effect of different levels of gossypol, 348.
— of vitamin E-deficient rats, enzyme activities, 364.
Lymphocytes of thymus, spleen, and lymph nodes of protein-deficient rats, cyclic AMP metabolism and nucleic acid content, 924.
Lysine–arginine antagonism in chicks, involvement of food intake, 1122.

M

Magnesium and calcium retention in rats as determined by direct carcass analysis, failure of balance measurements to predict actual retention, 1157.
— -deficient rats, depressed immune response, 791.
Maillard reaction, nutritional consequences as affected by the absorption of fructose-L-tryptophan in the large intestine of the rat, 989.
Maize, whey protein concentrate used as a supplement to, 147.
Malnutrition, experimental, in the rat, 631.
—, maternal, and neonatal intestinal function in rats, 1476.
—, protein, in rat brains, effects, 1090.
Man, comparative value of L-, DL-, and D-methionine supplementation of an oat-based diet, 809.
—, creatine metabolism, 428.
—, effect of calcium and phosphorus on fluoride metabolism, 733.

—, effects of high and low risk diets for colon carcinogenesis on fecal microflora and steroids, 878.
—, in vivo platelet function, beneficial effect of increased dietary linoleate, 1286.
— with marginal intakes of protein and energy, nitrogen balance, 914.
—, metabolism of [^{35}S]taurine, 1206.
Manganese and cadmium interactions in ovine tissues, 599.
Markers, nutrient, in rat diets, feasibility studies of heavy metals (cerium, terbium, ytterbium, lutetium, and iridium), 660.
Meal-feeding, effect on daily variations of insulin, glucose, and NADP-linked dehydrogenases in rats, 1132.
— in rats, effect of pancreatectomy or adrenalectomy, 1176.
— in rats, regulation of glucose-6-phosphate dehydrogenase and 6-phosphogluconate dehydrogenase, 714.
Meal frequency, influence on in vivo hepatic fatty acid synthesis, lipogenic enzyme activity, and glucose tolerance in the chicken, 963.
Meal timing and circadian rhythms in mice, 171.
Menstrual cycle and diurnal variations in serum vitamin B-12 and folacin activity in baboons, 571.
Mercury, life-term effects on mice, 452.
Metabolic effect of dietary disaccharides in the rat, 1186.
— effects of tryptophan and histidine deficiencies in the rat, 550.
— studies on the development of ethanol-induced fatty liver in KK-A^y mice, 1500.
Metabolism and biological activity of *cis*- and *trans*-phylloquinone in the rat, 1519.
—, calcium, in the rat, effect of protein intake, 475.
— of L-methionine and *N*-acetylated derivatives of methionine, 331.
— of [^{35}S]taurine in man, 1206.
— of tropoelastin and proteolytic enzymes in the chick aorta, effects of high dietary levels of cholesterol, 46.
Metabolizable energy of young chickens, derivation from the diet and nitrogen retention, influence of genetic differences in feed efficiency, 726.
Metals, heavy, as multiple nutrient markers, feasibility studies in rats, 660.
—, heavy, studies of nutritional safety of in mice, 670.
Methionine, dietary, free and protein-bound, intestinal absorption in the rat, 867.
—, effect of substitution of α-hydroxy analog in diet of rats, 372.
—, L-, DL, and D-, supplementation of an oat-based diet for humans, 809.
—, metabolism of L-methionine and *N*-acetylated derivatives, 331.
— for the rat, acetylmethionine as a source, 326.
— replacement value of *N*-acetylmethionine and homocysteinethiolactone hydrochloride for growing rats, 577.
— and sulfate, effect of molybdate on sulfide production by ruminal microorganisms of sheep, 1199.
— toxicity in the chick, nutritional and metabolic implications, 1168.
DL- and L- — supplementation, effects on cystathionine excretion in relation to vitamin B-6 nutriture of rats, 1334.
Methyl mercury, life-term effects on mice, 452.
Mice, circadian rhythms with a single daily meal at different stages of lighting regimen, 171.
—, hepatic cell structure and function as affected by severe riboflavin deficiency, 562.
— injected with gold thioglucose, accumulation of gold in various organs, 957.
—, KK and KK-A^y, effects of nutritional factors on the development of ethanol-induced fatty liver, 1263.
—, KK and KK-A^y, induction of fatty liver by ethanol drinking, 1253.
—, KK-A^y, metabolic studies on the development of ethanol-induced fatty liver, 1500.
—, life-term effects of mercury, methyl mercury, and nine other trace metals, 452.
—, nutritional safety of some heavy metals, 670.
Micelle formation, effect on absorption of neutral fat and fatty acids by the chicken, 827.
Milk consumption, effects on serum tryptophan binding and brain tryptophan concentrations in rats, 1359.
— production and nitrogen utilization in response to postruminal infusion of sodium caseinate in lactating cows, 1111.
— — in rats, technique for estimating, 413.
Mineral metabolism of rats, effects of high altitude and hypophagia, 278.
Mitochondrial function, heart, effects of semistarvation on rat liver, kidney, and, 208.
— oxidative metabolism in severe riboflavin deficiency in mice, 562.
Molybdenum, effect on sulfide production from methionine and sulfate by ruminal microorganisms of sheep, 1199.
Mucopolysaccharides, porcine skin, alterations in zinc deficiency, 154.
Muscle, rat, protein synthesis as affected by a high tyrosine–low protein diet, 885.

N

NADP-linked dehydrogenases in rats, effect of meal-feeding on daily variations, 1132.
Neonatal growth of hypotrophic rats, lipid composition of brown adipose tissue as related to nutrition, 982.
— intestinal function in rats, effect of maternal protein deprivation, 1476.
— piglet, development of ceruloplasmin, 624.
— rat liver, effect of starvation on protein synthesis, 1326.
Niacin and tryptophan metabolites in humans, effects of excess intake of leucine and valine deficiency, 1241.
Nickel deficiency and nickel–rhodium interaction in chicks, 1607.
— deficiency in rats, 1620.
— –rhodium interaction in chicks, 1607.
Nitrogen balance of men with marginal intakes of protein and energy, 914.
— metabolism, cecal, and amino acid absorption in the rabbit, 245.

— reserves and plasma nitrogen fractions in growing cattle, 1584.
— — in the ruminant, 1578.
— restriction, effect on the utilization of α-keto-isovalerate for growth in the weanling rat, 119.
— retention in young chickens, influence of genetic differences in feed efficiency on derivation of metabolizable energy from diet and, 726.
— — in rats, effect of different levels of gossypol, 348.
— utilization in response to postruminal infusion of sodium in lactating cows, 1111.
—, utilization from soybean meal, casein, zein, and urea by mature sheep, 267.
Nomenclature policy: generic descriptors and trivial names for vitamins and related compounds, 134.
Nucleic acid content in the lymphocytes of the thymus, spleen, and lymph nodes of protein-deficient rats, 924.
Nutritional values of new high protein oat varieties, 1048.

O

Oat-based diet for humans, comparative value of L-, DL-, and D-methionine supplementation, 809.
— varieties, high protein, nutritional values, 1048.
Obesity, spontaneous, in rats, effects of exercise and of food restriction on the development, 543.
Oral contraceptives, influence of dietary lipids on iron and copper levels of rats, 1269.
Organic acid production and pattern of digesta movement in the gastrointestinal tract of swine, 759.
Ornithine decarboxylase activity in regenerating liver from rats adapted to controlled feeding schedules, 408.
Orotate excretion in growing rats fed amino acid-deficient diets, 141.
Orr, Lord Boyd, biography of, 517.
Oxidation of retinol and ethanol in rats, effects of zinc deficiency, 1486.
Oxygen consumption of germfree rats, lack of effect of cecectomy, 1237.

P

Pancreatectomy, effect on responses of rats to meal-feeding, 1176.
Pancreatic fibrosis, prevention in chicks, efficacy of selenium in selenium compounds and feedstuffs, 106.
— xanthine dehydrogenase in the chick, dietary and hormonal regulation, 1020.
Pantothenic acid deficiency, effects on cellular antibody synthesis in the rat, 17.
Parathyroidectomized rats, effect of dietary calcium deficiency during pregnancy on zinc mobilization in intact and, 220.
Parenteral amino acid utilization in pigs, 1535.
— nutrition of normal and traumatized rats, comparison of two amino acid solutions, 1318.
Parturition in rats, effects of some nutritional deficiencies, 1553.
Peroxidase and disaccharidase activities in parenterally nourished rats, 776.
Phenylalanine, effect of substitution of α-hydroxy analog in diet of rats, 372.
— hydroxylase and tyrosine aminotransferase activities in chronically uremic rats, 122.
6-Phosphogluconate dehydrogenase and glucose-6-phosphate dehydrogenase, regulation in the meal-fed rat, 714.
Phosphorus, effect on fluoride metabolism in man, 733.
cis- and *trans*-Phylloquinone in the rat, metabolism and biological activity, 1519.
Pigs, alterations of skin acid mucopolysaccharides in zinc deficiency, 154.
—, development of ceruloplasmin in the neonatal period, 624.
—, effects of diets containing dried whey on the lactase activity of the small intestinal mucosa and contents of the small intestine and cecum, 851.
—, growing effects of various dietary levels of dried whey on performance, 846.
—, growing interactions of dietary calcium with toxic levels of lead and zinc, 112.
—, influence of dietary 1,3-butanediol on weight gain, blood, and liver metabolites and lipogenesis, 161.
— small intestine, changes in the intestinal lactase activity from birth to 6 weeks of age, 1032.
—, young, utilization of amino acids administered enterally or parenterally, 1535.
Placenta, rat, effect of zinc deficiency during latter third of pregnancy, 1466.
Plasma free fatty acids in rats, effect of dietary linoleate, 995.
— and liver fatty acids in rats fed low and high fat diets, effects of pyridoxine deficiency on the composition, 1371.
— nitrogen fractions in growing cattle, 1584.
— tryptophan to neutral amino acid ratio and protein intake, correlation between in the self-selecting weanling rat, 1412.
— of vitamin E-deficient rats, increased activity of pyruvate kinase, 1221.
Platelet function in man, beneficial effect of increased dietary linoleate, 1286.
Porcine skin mucopolysaccharides, alterations in zinc deficiency, 154.
Potatoes, whey protein concentrate used as a supplement, 147.
Poultry feed supplements, protein efficiency ratio method for evaluation, 688.
Pregnancy in intact and parathyroidectomized rats as affected by dietary calcium deficiency, 220.
— in rat as affected by massive doses of ergocalciferol plus cholesterol, 741.
— in rat, effects of zinc deficiency on fetal brain, liver, and placenta, 1466.
— superimposed upon growth in the rat, effects of different levels of pyridoxine, 607.
Proceedings, American Institute of Nutrition (*see* American Institute of Nutrition)
Prostaglandin metabolism in rats, effects of linoleate enrichment of diet, 995.
Protein(s), computer-based method for calculation of the available energy, 200.
— content of diet, effect on food intake and preference of young, adult, and diabetic rats, 1395.

— content of diet, effect on uptake of arginine by rat liver, 1215.
— content of male rat brain, effects of riboflavin repletion during developmental phases, 1150.
— -deficient rats, cyclic AMP metabolism and nucleic acid content in lymphocytes of thymus, spleen, and lymph nodes, 924.
—, dentine, as affected by dietary selenium, 338.
— deprivation, effect on in vitro neonatal intestinal function in rats, 1476.
— -deprived rats, ammonia intoxication—a hazard during rehabilitation, 1384.
—, dietary, effect on tyrosine activity in the rat, 439.
—, dietary, effect of variations and amino acids on the alkaline phosphatase of the zinc-deficient chick, 385.
—, dietary, effects of quantity and quality on glucose metabolism in rats, 1525.
— diets, effects on induction of microsomal drug-metabolizing enzymes in rat liver, 1631.
— of different biological value, free amino acids in crocodilians, 616.
— efficiency ratio method for the evaluation of poultry feed supplements, 688.
—, enamel, as affected by dietary selenium, 338.
— and energy deficiencies (experimental) in the rat, 631.
— and energy, effects of the most limiting essential amino acids of gluten, casein, and zein on the self-selection, 1405.
— and energy, nitrogen balance of men with marginal intakes, 914.
— fungus grown on natural gas, feeding studies in rats, 311.
— intake, effect on parturition in rats, 1553.
— intake, high, effect on calcium metabolism in the rat, 475.
— intake in the self-selecting weanling rat, correlation between the plasma tryptophan to neutral amino acid ratio and, 1412.
— levels, effects on renal glucose-6-phosphatase activity of intact and thyroparathyroidectomized rats, 1278.
— levels, effects of various levels during gestation and lactation with first-litter sows, 1291.
— malnutrition and undernutrition in rat brains, effects, 1090.
— nutrition of the golden hamster, 38.
— quality of new oat varieties, 1048.
— requirements of man, comparative nitrogen balance response within the submaintenance-to-maintenance range of intakes of wheat and beef proteins, 534.
— -sparing action of dietary carbohydrate in rats, possible intervention of insulin, cyclic AMP, and glucocorticoids, 906.
— synthesis in the chick, effect of inhibitors on plasma levels of vitamin K-dependent clotting factors, 972.
— synthesis in liver, muscle, and brain of rats fed a high tyrosine–low protein diet, 885.
— synthesis in neonatal rat liver, effect of starvation, 1326.
Pyridoxine deficiency, effects on the composition of plasma and liver fatty acids in rats fed low and high fat diets, 1371.
—, effects of different levels fed during pregnancy superimposed upon growth in the rat, 607.
Pyruvate kinase, increased activity in plasma of vitamin E-deficient rats, 1221.

Q

Quail, Japanese, protection against zinc deficiency by prior excess dietary zinc, 1509.
—, mature Japanese, effect of choline deficiency on utilization of labeled precursors of choline in liver, 226.

R

Rabbit, cecal nitrogen metabolism and amino acid absorption, 245.
—, normal and cholesterol-fed, cholesterol kinetic analysis, effects of saturated versus polyunsaturated fat and of cholestyramine, 649.
Rapeseed flour fed to weanling rats, effect of hydrogen peroxide treatment on the nutritional quality, 317.
Reference substances, nonabsorbed, in gastrointestinal tract of the chicken, 1549.
Renal glucose-6-phosphatase activity of intact and thyroparathyroidectomized rats, effects of dietary protein and calcium, 1278.
Renin–angiotensin system in rats, influence of vitamin B-6, 1192.
Respiratory decline, mitochondrial, in the vitamin E-deficient rat, cytoplasmic factors required for suppression, 588.
Retinoic acid, distribution in rat and human testes, 467.
Retinol and ethanol oxidation in rats, effects of zinc deficiency, 1486.
Retinyl acetate and retinoic acid, labeled, distribution in rat and human testes, 467.
— —, effect on growth of hamsters fed vitamin A-deficient diets, 215.
Rhizopus oligosporus-fermented soybeans, free fatty acids identified as antitryptic factor, 1356.
Rhodium–nickel interaction in chicks, 1607.
Riboflavin and mouse hepatic cell structure and function; mitochondrial oxidative metabolism in severe deficiency states, 562.
— repletion, effects during developmental phase on behavioral patterns, brain nucleic acid and protein contents, and erythrocyte glutathione reductase activity of male rats, 1150.
Ribonuclease activity of rat cerebrum and liver, effects of early undernutrition and subsequent refeeding, 1104.
Ribosomes, rat liver, developmental changes in distribution of in response to dietary manipulations, 839.
Rice, whey protein concentrate used as a supplement, 147.

S

Safflower oil, glucogenic and ketogenic capacities in fasting rats, 185.
Selenite selenium in the hen and egg, 32.
Selenium, biological availability in feedstuffs and selenium compounds for prevention of exudative diathesis in chicks, 96.

— content of food consumed by Canadians, 274.
—, dietary organic and inorganic, developmental and postdevelopmental uptake into molar teeth of rats, 338.
—, efficacy in selenium compounds and feedstuffs for prevention of pancreatic fibrosis in chicks, 106.
— levels in human blood and tissues in health and in disease, 1026.
—, natural, and selenite in the hen and egg, 32.
— toxicity in chicks, modification by dietary silver and copper, 769.
— —vitamin E deficiency, ultrastructure of gastrointestinal smooth muscle in ducks, 782.
Semistarvation, effects on rat liver, kidney, and heart mitochondrial function, 208.
Serum responses in rats as affected by dietary calcium levels, acid stress, and age, 1039.
— transaminase activity in the rat, effect of different levels of gossypol, 348.
— tryptophan binding in rats as affected by skim milk, whole milk and light cream, 1359.
— vitamin B-12 and folacin activity in baboons, diurnal and menstrual cycle variations, 571.
Sheep, lactating, sodium requirements, 595.
—, mature, utilization of nitrogen from soybean meal, casein, zein, and urea, 267.
—, ruminal microorganisms, effect of molybdate on sulfide production from methionine and sulfate, 1199.
Silver and copper, dietary, modification of selenium toxicity in chicks, 769.
Skim milk, effect on serum tryptophan binding and brain tryptophan concentrations in rats, 1359.
Small intestine and cecum contents, and lactase activity of the small intestinal mucosa, effects of diets containing dried whey, 851.
— — of two breeds of swine, changes in intestinal lactase activity from birth to 6 weeks of age, 1032.
Smooth muscle, gastrointestinal, ultrastructure in ducks with a vitamin E–selenium deficiency, 782.
Sodium requirements of lactating sheep, 595.
Southwestern corn borer (*Diatraea grandiosella*), ascorbic acid an essential nutrient, 499.
Soybean(s) fermented by *Rhizopus oligosporus*, free fatty acids identified as antitryptic factor, 1351.
—, iron availability to rats, 253.
— meal, nitrogen utilization by sheep, 267.
— —, raw or heated, fat digestion and absorption in chicks, 57.
Splenic lymphocytes of protein-deficient rats, cyclic AMP metabolism and nucleic acid content, 924.
Starvation, effect on protein synthesis in neonatal rat liver, 1326.
Steers, fasted and fasted-refed, changes in fatty acid synthesis and lipogenic enzymes in adipose tissue, 1055.
Stomach and upper intestine of the rat in the regulation of food intake, 1491.
Sucrose and fat, dietary, effect on activities of several rat hepatic enzymes and their diurnal response to a meal, 701.
— feeding, effect on intestinal transport of sugars in two strains of rats, 894.
Sulfate and methionine, effect of molybdate on sulfide production by ruminal microorganisms of sheep, 1199.
Sulfide production from methionine and sulfate by ruminal microorganisms of sheep, effect of molybdate, 1199.
Swine, first litter, effects of various protein levels during gestation and lactation, 1291.
—, gastrointestinal tract, sites of organic acid production and pattern of digesta movement, 759.
—, two breeds from birth to 6 weeks of age, changes in the intestinal lactase activity in the small intestine, 1032.

T

[^{35}S]Taurine, metabolism in man, 1206.
Teeth, rat molar, developmental and postdevelopmental uptake of dietary organic and inorganic selenium, 338.
Tenebrio molitor L., essential dietary amino acids for larval growth, 1071.
Testes, rat and human, retinyl acetate and retinoic acid distribution, 467.
— of vitamin E-deficient hamster, reversible injury, 484.
Thiamin intake, effect on parturition in rats, 1553.
Thymus lymphocytes of protein-deficient rats, cyclic AMP metabolism and nucleic acid content, 924.
Thyroparathyroidectomized rats, effects of dietary protein and calcium levels on renal glucose-6-phosphatase activity of intact and, 1278.
d-α-Tocopheryl hydroquinone, antisterility activity in the vitamin E-deficient male hamster and rat, 491.
— — in the vitamin E-deficient female rat, antisterility and antivitamin K activity, 495.
Trace elements, effects in life-term studies in rats, 421.
— metals, life-term effects on mice, 452.
Traumatized rats, comparison of two amino acid solutions for total parenteral nutrition of normal and, 1318.
Triundecanoin, glucogenic and ketogenic capacities in fasting rats, 185.
Tropoelastin and proteolytic enzymes in the chick aorta, effects of high dietary levels of cholesterol on the metabolism, 46.
Trout, tryptophan deficient rainbow, histological alterations, 861.
Trypsin-inhibiting activity in *Rhizopus oligosporus*-fermented soybeans, 1351.
Tryptophan in brain of rats, effects of skim milk, whole milk and light cream, 1359.
— deficiency in the rat, metabolic effects, comparison with histidine deficiency, 550.
— -deficient rainbow trout, histological alterations, 861.
— and niacin metabolites in humans, effects of excess intake of leucine and valine deficiency, 1241.
—, plasma, to neutral amino acid ratio and protein intake in the self-selecting weanling rat, correlation, 1412.
—, serum free, effects of skim milk, whole milk and light cream, 1359.

Tungsten, effect in life-term studies in rats, 421.
Turnip greens fed to rats, factors affecting the concentration and bioavailability of iron, 459.
Tyrosine aminotransferase and phenylalanine hydroxylase activities in chronically uremic rats, 122.
— feeding in rats, protein synthesis in liver, muscle, and brain, 885.
— toxicity in the rat, effect of dietary protein, 439.

U

Ultrastructure of gastrointestinal smooth muscle in ducks with a vitamin E–selenium deficiency, 782.
Undernutrition, early, and subsequent refeeding, effects on alkaline ribonuclease activity of rat cerebrum and liver, 1104.
— and protein malnutrition in rat brains, effects, 1090.
Urea excretion in growing rats fed amino acid-deficient diets, 141.
—, nitrogen utilization by sheep, 267.
Uremia, activities of phenylalanine hydroxylase and tyrosine aminotransferase in rats, 122.
Urinary chromium levels of young women eating freely chosen diets, 64.
— nitrogenous compounds and liver amino acid-catabolizing enzymes in rats, effect of zinc deficiency, 26.

V

Valine deficiency, effect on tryptophan and niacin metabolites in humans, 1241.
—, effect of substitution of α-hydroxy analog in diet of rats, 372.
— -free diet, effect of force-feeding on gastrointestinal function of rats, 257.
Vitamin A deficiency and fetal growth and development in the rat, 1299.
— -deficient diets, effect of α-retinyl acetate on growth of hamsters, 215.
— toxicity in rats, influence of excess vitamin E, 1600.
Vitamin B-6-deficient rat, avoidance behavior, 1363.
—, influence on renin–angiotensin system in rats, 1192.
— levels and exercise, effects on glutamic-pyruvic transaminase activity in rat tissues, 401.
— nutriture in rats, cystathionine excretion: strain differences and effects of DL- or L-methionine supplementation, 1334.
Vitamin B-12 activity in baboons, diurnal and menstrual cycle variations, 571.
— -deprived rats, cardiac structure and function, 1567.
Vitamin C requirements of channel catfish (*Ictalurus punctatus*), 557.
Vitamin E deficiency in the rat, cytoplasmic factors required for suppression of mitochondrial respiratory decline, 588.
— -deficient female rat, antisterility and antivitamin K activity of *d*-α-tocopheryl hydroquinone, 495.
— -deficient hamster, reversible testis injury, 484.
— -deficient male hamster and rat, antisterility activity of *d*-α-tocopheryl hydroquinone, 491.
— -deficient rats, increased activity of pyruvate kinase in plasma, 1221.
— -deficient rats, lead poisoning, 1481.
— -deficient rats, studies on the formation of lipid peroxides and on some enzymic activities in liver, 364.
— excess, influence on vitamin A toxicity in rats, 1600.
— –selenium deficiency, ultrastructure of gastrointestinal smooth muscle in ducks, 782.
Vitamin K deficiency in the chick, effect on plasma levels of vitamin K-dependent clotting factors, 972.
— metabolism and biological activity in the rat, 1519.

W

Warfarin, effect on plasma levels of vitamin K-dependent clotting factors in the chick, 972.
Wheat and beef proteins, comparative nitrogen balance response within the submaintenance-to-maintenance range of intakes of man, 534.
Whey, dried, in diets, effects on lactase activity of the small intestinal mucosa and contents of the small intestine and cecum of the pig, 851.
—, dried, effects of various dietary levels on performance of growing pigs, 846.
— protein concentrate as a supplement to maize, rice and potatoes, a chemical and biological evaluation using growing rats, 147.
Williams, Robert R., biography of, 1.
Women, young, urinary chromium levels on freely chosen diets, 64.
Wound(s), healing, in the rat and guinea pig, effect of supplements of zinc salts, 815.
—, incised, in rat and guinea pig, effect of supplements of zinc salts on healing, 822.

X

Xanthine dehydrogenase, pancreatic, in the chick, dietary and hormonal regulation, 1020.

Z

Zein, nitrogen utilization by sheep, 267.
Zinc and cadmium interactions in ovine tissues, 599.
— deficiency, alterations of porcine skin mucopolysaccharides, 154.
— deficiency, effect on urinary excretion of nitrogenous compounds and liver amino acid-catabolizing enzymes in rats, 26.
— deficiency, effects on the oxidation of retinol and ethanol in rats, 1486.
— deficiency during latter third of pregnancy, effects on fetal rat brain, liver, and placenta, 1466.

— deficiency, protection by prior excess dietary zinc in young Japanese quail, 1509.
— -deficient chick, effect of variations in dietary protein and amino acids on the alkaline phosphatase, 385.
— -deficient rats, enzyme activities in the epidermis, 1391.
— intake, effect of parturition in rats, 1553.
— and lead, toxic levels in pigs, interactions with dietary calcium, 112.
— mobilization during pregnancy in intact and parathyroidectomized rats, 220.
— salts, effect of supplements on the healing of granulating wounds in the rat and guinea pig, 815.
— salts, effect of supplements on healing of incised wounds in the rat and guinea pig, 822.
